

Smith System®

Constellate™ Storage

A sleek and versatile solution designed to elevate organizational needs in learning environments. Crafted with premium materials and meticulous attention to detail, Constellate Storage seamlessly blends functionality with modern aesthetics.

Its modular design offers customizable configurations to suit any learning environment. The innovative interlocking system allows for effortless assembly and reconfiguration, providing flexibility to adapt to evolving storage requirements.

With an array of storage options including shelves, totes, cubbies, lockers and book displays, Constellate Storage maximizes space efficiency without compromising on style. Its clean lines and minimalist silhouette create a contemporary look that complements any learning environment, while durable construction ensures long-lasting performance.

Constellate Storage enhances organization and productivity. From stowing school supplies to displaying books, this versatile storage solution empowers schools to curate spaces with ease and sophistication.

Innovation/Usage

The Smith System Constellate Storage revolutionizes learning environments by seamlessly blending functionality with aesthetics. Its sleek design and customizable configurations not only provide ample storage but also contribute to the beauty and comfort of educational spaces. The Constellate Storage's modular system enables educators to create versatile layouts that promote organization and maximize space efficiency while enhancing the visual appeal of classrooms.

What truly sets Constellate Storage apart are its innovative features. Its unique interlocking system allows for easy assembly and reconfiguration, catering to the evolving needs of dynamic learning environments.

Additionally, the Constellate Storage's durable construction ensures longevity, withstanding the rigors of daily use in educational settings.

By combining practical storage solutions with contemporary design elements, the Constellate Storage enhances the ambiance of learning environments, fostering a conducive atmosphere for creativity, collaboration, and knowledge sharing. Whether used in classrooms, libraries, or administrative offices, the Constellate elevates the learning experience.

Built Environment Solution, Durability, Functionality & Quality

Smith System's Constellate storage system brings a revolutionary approach to classroom organization, addressing the pressing need for adaptable storage solutions in educational environments. Traditional storage options often fall short in accommodating the evolving needs of classrooms, leaving educators struggling to optimize space and functionality. Constellate Storage rises to this challenge by offering a dynamic solution that evolves alongside changing classroom dynamics.

One of the primary problems Constellate Storage solves is the lack of flexibility in traditional storage systems. As learning environments shift to accommodate different grade levels, teaching methods, and curriculum requirements, the need for adaptable storage becomes increasingly apparent. Constellate Storage's modular design allows for easy reconfiguration, enabling school districts to customize storage layouts based on specific classroom needs. This adaptability ensures that storage space remains optimized and relevant, regardless of changes in classroom configuration or teaching approaches.

Constellate Storage's superiority over existing storage solutions lies in its ability to provide a scalable and customizable storage infrastructure that grows and evolves with the educational landscape. Unlike fixed storage units that become obsolete or impractical over time, Constellate Storage offers longevity and versatility, making it a wise investment for school districts seeking sustainable solutions for their storage needs.

Quality standards are paramount in educational settings, where furniture and equipment endure rigorous daily use. Constellate meets these standards with its high-quality materials and precision engineering, ensuring durability and reliability in even the busiest classrooms. Backed by performance warranties, Constellate Storage provides peace of mind to educators and administrators, guaranteeing that their investment will withstand the test of time and usage.

In conclusion, Smith System's Constellate storage system represents a transformative solution for classrooms, addressing the need for adaptable storage in an ever-changing educational landscape. Its innovative design, superior quality, and performance warranty make it the ideal choice for school districts looking to optimize storage space while enhancing classroom functionality and flexibility.

Environmental Sustainability

The Constellate product range is made in a factory that adheres to ISO 14001 standards, using parts from approved suppliers committed to responsible sourcing. Constellate features laminate panels made entirely from recycled and recovered wood fiber, and its metal support framing is 99% recyclable. To minimize waste, the manufacturing uses precise nesting software and efficient machinery designed to reduce scrap and enhance energy efficiency with a low amp/high voltage system. Sawdust generated during production is repurposed by a local landfill partner to improve landfill conditions. Constellate's packaging is made from recycled materials and is also recyclable. The product is covered by a lifetime warranty to prevent the need for future replacements, thus avoiding landfill use. Additionally, Constellate meets BIFMA standards and exceeds the criteria for GreenGuard Gold certification.

The Smith System Constellate storage offers an environmentally friendly solution for schools by allowing them to efficiently stack, unstack, and reuse these storage units across the district. This flexibility minimizes the need for purchasing new storage resources, reducing material waste and promoting a culture of sustainability. By reusing and repurposing the Constellate storage, schools can significantly decrease their environmental footprint, supporting eco-friendly practices while optimizing their storage capabilities.
