

# TECHNOLOGY

## BEFORE THE EVENT

1. System wide
  - a. Data back-up system – off site and out of area – accessible from remote location
  - b. Redundancy of power supply (no. of power companies, no. of feeds/transformers, back-up generators) for key equipment
  - c. Establish secondary hardware/software system to access/manipulate district data base in remote location
2. Local Issues
  - a. Hardware – develop and maintain accurate inventory to easily replace and establish passive protection procedures
  - b. Software – know who and how to reestablish programs
3. Phone system
  - a. Satellite phones for key personnel
  - b. If VOIP, call manager system in two locations
