# Course Description

---

Tour of the new Bluestem Middle School.  
Representatives from the school district, architect and general contractor will provide an overview of the design, construction and use of the building.

# Learning Objectives

---

At the end of this course, participants will be able to:

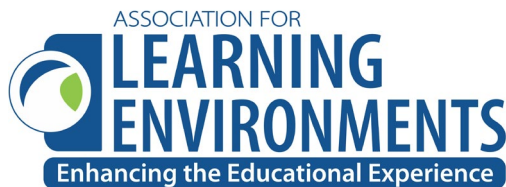

1. This project is a real-world example of successful execution of project management best practices in the context of a public health emergency.
2. Constraints imposed by the COVID-19 pandemic required real-time schedule and budget adjustments during design to allow for successful delivery of the project.
3. In consideration of the public health recommendations made during the pandemic, the facility's design was re-evaluated and adjustments were made in order to permanently improve outcomes for Student and Staff health and safety post-occupancy.
4. Jobsite health and safety documentation protocols were imposed during the course of construction that facilitated high productivity while protecting workers on-site.

This concludes The American Institute of Architects  
Continuing Education Systems Course
