Old-School Nostaloia

## $1957$

$2018$

HOW CAN WE PREPARE OUR LEARNERS FOR THE FUTURE?

# OUR LEARNERS NEED MODERN LEARNING ENVIRONMENTS 

## Pedagogy

## 

## Classical

What to cut?
What to keep?

## Contemporary

What to create?

## Beginning in the shallow end of the pool

Modern Mission, Pedagogy, And Culture
Focus on students, innovation mindset, roles, inclusion of all community.

Programs for Learning Curriculum, field experiences, virtual, instructional approach, selfmanagement

Structural Formats:
Spaces, Schedules
Grouping of learners, Grouping of
personnel

## Three Critical Arenas for Informed Decision-Making How are these interdependent? Simultaneous?

## Individually Owned Rooms

Optimized for: Individualized teaching practices.
traditional structures and timetable,
classroom - based community, single teacher classrooms teacher - directed learning

## Shared in a Pair

Optimized for: Pairings within grade, department \& or interdisciplinary, shared unit/lesson design, co-delivery, flexible/ dynamic groupings, more varied learning modalities, shared assessment, easier for project - based, more options for breakout

Teacher Collaboration

## Pedagogy

Curriculum

Community
Classroom
Beyond the Classroom

## Learning Community

Optimized for: Curriculum organized around interdisciplinary themes, distributed democratic leadership, shared student responsibility, co-facilitated, cohort scheduling, highest levels of "community" and self directed learning.

Building the Structural Nest

## PROGRAM STRUCTURE CONTINUUM

|  | ANTIQUATED | CLASSICAL | CONTEMPORARY |
| :---: | :---: | :---: | :---: |
|  | - Self-contained <br> - All rooms the same | - Field experience <br> - Use of existing spaces for effective instructional grouping | - Virtual spaces 24/7 <br> - Field experience <br> - Wide range: learning spaces create new learning experiences |
| TIME | - Standardized, $19^{\text {th }}$ century agrarian, 13-year experience <br> - Daily schedule standardized by habit | - Coordinated timeframes when possible to support learners | - Task determines time <br> - Teachers work with students to bid for time segments over week and month for on-site |
| GROUPING | - Strict grade-level grouping K-12 <br> - Classroom; no instructional grouping | - Some cross-grade cooperative groups <br> - Individualized <br> - Differentiated grouping | - Personalized on-site/virtual <br> - Field experience based on quest <br> - Multi-age based on learning progressions |
| PERSONNEL | - One teacher, self-contained in isolation to match class <br> - Faculty grouped by grade/department in isolation <br> - No interschool connections | - Some vertical and interdisciplinary within and between buildings | - Teacher as multiple affiliations: <br> - Inquiry quest groups <br> - Coaching individuals <br> - Virtual/on-site direct teaching <br> - Seminar/webinar <br> - Global cyber faculty |

## Physical Spaces

- Expansive view of school redesign and repurposing existing spaces.
- Furniture as sculpting spaces
- Outdoor spaces
- Off-campus spaces
- Learning spaces at home

## Virtual Spaces

- Strategic use of virtual
- PD on innovative use of virtual

## Brain Science Break

| Safety of Learner | Instructional Design |

| What safety for learner <br> ideas am I committed to? | What instructional design <br> ideas am I committed to? |
| - Physical | - Direct instruction/Mini- |
| - Emotional | lessons |
| - Different types of |  |
| thinking |  |$\quad$| -Collaboration |
| :--- |

| Organization of Things | Use of Structure |
| :--- | :--- |
| What organizational ideas <br> am I committed to? | What use of structures <br> am I committed to? |
| - Commons spaces | - Text/visuals |
| - Intentionality of | - Color |
| access | - Furniture |
| - Labeling | - Lighting |
| - Individual materials |  |

SPACES FOR DESIGNED INTERACTION

Elevated spaces stimulate learning.

Modern learning environments foster a sense of purpose and a sense of belonging.

Age-based spaces for specific tasks.

## CLEAN SPARE SPACES INVITE INTERACTION

BOOK MATTERS: PRINT AND DIGITAL IN TRANSITION
rosanbosch.com

## MAKERSPACES

## Off-campus: PLACE-BASED Learning

- Field experiences
- Internships
- Site visits
- Authentic learning opportunities

Spaces have direct implications on design of learning experiences

- Forum
- Project Terrace
- R and D Garage
- Seminar Room
- Da Vinci Lab
- Café
- Learning Suite
- Innovation Station

Modern furniture sculpts learning environments.

NOOK Booths with integrated technology: monitors, outlets, lighting

Key Floor Plan

## Learning Commons | Campfire

Inspirational Images

Key Floor Plan

Soft seating

Play spaces are learning spaces

There is interplay between spaces and inviting furniture choices both child friendly and classical.

-Student friendly furniture in easy spaces invite calm.

- Note the tree-house effect.

Reimagining existing spaces

Opening up existing spaces with new furniture.

Cheryl Johnson
2nd Grade - York Suburban District, PA
เทाtเทีเ
WELCOME

Research and Development Action Plans

|  | Research Teams (who, when, where) | Research Sources (who, when, how, where) | Share Findings <br> (when, where, how) | Prototype 1 | Prototype 2 | Prototype 3 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| SPACE <br> TIME <br> GROUPING |  |  |  |  |  |  |
| PERSONNEL |  |  |  |  |  |  |

## Discuss with your group:

- How do the architectural design of spaces impact learners in a building?
- How might furniture choices and placement impact learning opportunities for a teacher or team?
- How is the brain impacted by spaces and furniture?

5 minutes

Contemporary is in the shallow end of the pool. Moving now to the deep end of the pool Future of Learning

Four Structures: LEARNER GROUPING

## Instructional Grouping Choices: VARIABLES

## PURPOSE - Identity

- Voluntary/ Teacher determined
- Long term /short term
- Facilitation of group/ Independent
- Numbers in group

## Purposes for Instructional Grouping

$\checkmark$ Skill needs
Mixed skills competence
Mixed roles
$\checkmark$ Readiness / timing
$\checkmark$ Think tank / decision making
$\checkmark$ Interests
$\checkmark$ Social interaction / safety
$\checkmark$ Civill discourse
Routine / anchorgroups
$\checkmark$ Ad hoc

## The Power of One

-Personal pace
-Self-reflection
-Confronting competence
-Thriving competence
-Creative risks
-Stakeholder in task

## The Importance of Working Solo

Ultimately each learner is on his or her own journey.

Confidence is developed with each personal step.

Fascination, curiosity and interest is a personal motivator.

## Purposeful Pairs

-Shared reflection
-Focused communication
-Honest feedback -Possible parallel work

Problem Solving Trios and Quartets

## -Completing tasks

-Problem solvers

- Group performances
-Role designations
- Sense of affiliation

- Enough members for an array of opinions.
- Enough members to counter one dominant member.

Discussion
Groups 5 to 8

- Formal discussion groupings.
- Informal open-ended groupings.
- Reflection on both process and ideas is critical.

## 12 is a Quorum

-Direct instruction coupled with interaction.
-Can work as a large group with sub-groups.
-Sensibility of a team.
-Identity is still maintained with 12.

## Expanding Community Grouping: Local, Global, Virtual

GLOBAL LIVES

## Grouping of Professionals

Personnel Grouping:

- Institutional
- Instructional

Personnel Categories:

- Teachers
- Teaching Teams
- Administrators
- Coaches
- Advisors
- Counselors
- Support Staff
- Special Designation Teachers
- Directors
- Mentors
- Aides
- Field Guide

Affiliations can be curricular

Grouping by Teaching Talent

$1=1 / P I\left\{\begin{array}{lll}\infty & & \\ -\infty & & \end{array}\right.$
$1 / P I\left\{\begin{array}{l}\infty \\ \infty \\ \infty\end{array}\right.$
$1 / P I\left\{\begin{array}{l}\alpha \\ 0\end{array}\right.$

## Subject Area

Interdisciplinary

Mentors: Student Projects

## Pathway

## Performance Field

Interest

## Global Teams

| Student Grouping Pattern | Teacher Configuration |
| :--- | :--- |
| Grade level grouping | Classroom teacher or team |
| Multi-age grouping | Teacher team |
| Interdisciplinary -single or <br> multi-grade | Interdisciplinary team |
| Pathway model -high school | Cohort coach |
| Quest-Based Projects | Match with Advisor |

Breaking away from the Tyranny of Time
TIME and SCHEDULE by HABIT

## Four Structures: SCHEDULES

-Long term habits
-Short term inhibitors
-Reimagining existing opportunities
-Flip function following form

- Opening up fresh possibilities
-Future forward planning

Consider impact on learning when time OPENS up:

- Replace graduation dates and deadlines with learning progressions.
- Some learners take more time and others finish at a younger age.
- Early entrance into college.
- Replace graduation with credentialing
- Start school when ready.
- Starting school later as in Finland

## Rethinking the layout of the academic year

- Length of the school year with wide variations.
- Year-long school
- Reshaping summer vacation into summer inquiries.
- Eliminating summer school as punitive.
- Rethinking that school needs an annual calendar.
- Consider the impact of two or three year cycles.

## Four Basic Models

1. Industrial model of different blocks of time but still often grouping students by age.
2. Vertical model of grouping students by subject and ability all at the same time.
3. A La Carte model where students access teachers and support anytime they need as they complete individualized and personalized pathways of study.
4. Bidding for time model where teachers match specific learning targets or bundles of learning targets to exactly the amount of time they need and then varied schedules are given to groups of students.

Often schools combine different models to achieve a schedule that really works.

## Case study: Lockwood

A high school starting this process opted to provide teams with a large chunk of time - equal to two hours or even a half of a day - once a week. This time was to be divided up between the team members using three blocks. Small, Medium, and Large blocks. (for example, $30 \mathrm{~min}, 90 \mathrm{~min}, 2$ hour)

The team would have to work together to make sure all of their learning targets were met. The idea was to train the team to think about time flexibly. In addition, it helped the team think about aligning learning targets to time in preparation for the school to move toward bidding for time.

## Case Study: Belgrade

This elementary and middle school wanted to close gaps quickly. They opted to have a vertical schedule for students three time a week during the morning. They taught granular subjects like language and mathematics during those sessions. Students could move up or down in levels immediately.

The afternoons of these days were interdisciplinary periods where students were grouped by ages and given large challenges to work on in teams. Two days a week students were in regular block schedules grouped by age. This was a transition schedule to train the community to think flexibly about time. There was a sixth day planned where students could gather for celebrations, delayed openings, or assemblies without disrupting a day.

## Planning a Schedule

The Highschool group in Billings MT wanted to see how compliance to state laws and AP courses would work in a bidding for time model. They used lego bricks to build out their requirements and then placed them in the bidding sample.
They quickly saw that they ended up with MORE time when it was used efficiently by the team.

|  | Day A | Day B | Day C | Day E | Total Min a Year |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Writing / Reading | 80 pm | 45 PM | 60 AM | 80 PM | 8800 |

Orchestrating form and purpose of student grouping.

# Direct correspondence to learner groupings on the institutional level. 

Matching it to personnel configuration.

Matching teacher talent and skill to the situation.

Team building requires collaborative facility.

## Thank you!
