# Course Description

---

- Mountain View School is a prekindergarten through grade 8, consolidated school which replaced three aging elementary schools and the city's outdated middle school building. The tour will highlight some of the building's key features beginning with the community's desire for a warm, welcoming, non-institutional feel, with underlying connections to nature.

# Learning Objectives

---

At the end of this course, participants will be able to:

1. Learn about the impact of lighting and material selections on occupant well-being and maintenance.
2. Learn about balancing the age gap of students with whole-school community spirit in a consolidated school.
3. Learn how to maintain a safe campus in a welcoming environment.
4. Learn how to provide flexible architecture to support ever-evolving technologies and pedagogies.

This concludes The American Institute of Architects  
Continuing Education Systems Course
