**Scope of Work Included**

Pre-Bond Planning;  
Facility Assessment;  
Project Visioning;  
Educational Specifications;  
Master Planning;  
Planning/Design Committees/Advisory Groups

## Sunset Primary School

West Linn, Oregon  
West Linn-Wilsonville School District

*DOWA-IBI Group Project*

The new school is a replacement school on the same site as the existing school had been for many decades. Built to a capacity of 450 students, the school gives a fresh start to the growing population of the district, and renews the legacy site, which has long been a community hub for the

families and neighbors. A cheerful mural at the entry features local flora and fauna.

Each classroom features a custom reading nook with a window seat that looks out onto the forested playground. Generously-sized extended learning porches connect classrooms and offer room for both small group learning and larger get-togethers.

The double-height, open library connects both levels of the classroom wing, creating a feeling of community and collaboration. A colorful gymnasium features a rock climbing wall and leads children to the adjacent covered play area.
