Construction: Est. June 2022

EST. COST / BID COST:
\$29,500,000 / \$25,814,341

BUILDING FEATURES:
Multi-purpose Room
STEM Classroom
Tutor Rooms

SITE FEATURES:
Multi-purpose Field
Learning Courtyard

SHAMROCK GARDENS ELEMENTARY SCHOOL

Charlotte, NC

Shamrock Gardens Elementary School was founded in 1953 and received multiple additions and renovations over the school's history. To accommodate explosive growth in Mecklenburg County, the aging school is being replaced with a modern learning environment.

The school features a secure courtyard for playground, outdoor learning, and the raised plant and butterfly gardens that are a significant part of school history and learning. Art, K1, cafeteria, and multipurpose rooms have access to the courtyard. To create a healthier learning environment, hand sinks are conveniently located outside the cafeteria and where students leave the playground to encourage hand washing. The design solution continues the traditions of Shamrock Gardens in an immersive learning environment that is resilient, healthy, and safe.
