Course Description

Each year the South Carolina Chapter plans a fall tour that is in an area of the state that does not normally host the annual conference. This year we will tour Catawba Ridge High School that won 2023 A4LE design award. The jury noted how beautiful the school is and wonderful blend of materials.

Learning Objectives

At the end of this course, participants will be able to:

1. Understand how the floor plan was organized to create a functional and safe environment.
2. Learn how the designers were able to separate the various drives (parent, student & bus) to allow for safe entry and exit from the site. Also, how to access the athletic fields.
3. Study spaces that encourage collaboration and enhance the social and emotional well-being of the students.
4. Understand the building types/separation as well as the building systems and how the selection of materials met building code requirements.

This concludes The American Institute of Architects
Continuing Education Systems Course
