Please indicate how the topic is applicable to Health, Safety, Welfare Design credits (as described in the link). You must clearly demonstrate and explain how the program will meet the HSW criteria

\* 6. Please select the PRIMARY Competency which the presentation addresses.

- Educational Visioning:** Exhibits an understanding of best and next practices related to educational leadership, programming, teaching, learning, planning and facility design. Establishes credibility with educators, community members and design professionals while conceiving and leading a community-based visioning process. Demonstrates the ability to articulate the impact of learning environments on teaching and learning and uses that ability to facilitate a dialogue that uncovers the unique needs and long-range goals of an educational institution and its stakeholders – translating that into an actionable written/graphic program of requirements for the design practitioner.
- Community Engagement:** Leads the internal and external communities through a discovery process that articulates and communicates a community-based foundational vision, forming the basis of a plan for the design of the learning environment. The vision is achieved through a combination of rigorous research, group facilitation, strategic conversations, qualitative and quantitative surveys and workshops. Demonstrates the skill to resolve stakeholder issues while embedding a community's unique vision into the vision for its schools.
- Educational Facility Pre-Design Planning:** Manages a master planning process that combines educational planning, facilities assessment and utilization, demographic research, capital planning and educational specifications with a community-based vision to establish a plan for learning environments. This includes the ability to translate existing or aspirational instructional models to specific programming and spatial relationships.
- Design of Educational Facilities:** Acts as a resource to the design team in providing ongoing guidance and support to ensure that the emerging and ultimate design aligns with the established community vision, education goals, future programming, written design standards, best/next practices and education policy.
- Educational Facility Implementation, Project Management/Project Delivery:** Has a working understanding of how the following areas impact the facility program: regulations and policies; project delivery methodologies; scheduling; preventative maintenance; life-cycle planning; and systems commissioning.
- Assessment of the School Facility:** The ability to objectively evaluate a learning environment post-occupancy and utilize that data to improve future projects. Implements a plan for educational commissioning that provides guidance on how to use and maximize the learning environment to meet the foundational vision established in the planning phase.
- Ethics/Professionalism:** Provides leadership and stewardship for the responsible investment of public and private funding into school facilities – while being a known advocate for the importance of the learning environment on a child's future. They lead and have a record of leading transparent processes that help communities find common ground in developing solutions to complex and sensitive issues – advocating for long term solutions that address the needs of all children and stakeholders including underserved groups.
