The Association for Learning Environments (A4LE)

A4LE Louisiana Chapter

Wednesday May 25, 2016

Lunch Served at 1:00 pm
Presentation/Tour: 2:00 pm—4:00 pm

Lee Magnet High School

1105 Lee Dr., Baton Rouge, LA 70808

Old School gets New Life!

Presented by: GraceHebert Architects

Sponsored by: Womack Construction

The design team of GraceHebert Architects and associate architects DLR Group were tasked with creating a technology rich, flexible and adaptable school that supports project based learning. Therefore the design for Lee High School does not follow a traditional school layout. The school consists of flexible spaces that can be configured for a variety of uses. Visual connections in learning labs and specialized spaces give students a reason to become excited about learning.

The school is designed around three specialized academies and a Commons Building. The specialized academies include Science, Technology, Engineering and Math (STEM), Bio-medical and Digital Arts. Students and staff at Lee High School will be able to collaborate throughout the facility, providing opportunities for interdisciplinary and cross-curriculum instruction. The facility is designed to promote real-life experiences, allowing students to apply what they learn in a classroom in a specialized laboratory within their academy.

Attendees will receive 2 AIA HSW CEU's

Sponsorship Opportunities Available!!

- ☐ **YES!** Our Firm would like to be a **\$500 Lunch Sponsor for the next Event**
