

# Frances Grice Cardinal Child Development Center

SAN BERNARDINO, CALIFORNIA

The new zero-net-energy Frances Grice Cardinal Child Development Center for San Bernardino City USD has a clear goal to elevate the educational experience for the youngest of students. The facility is located on the old agriculture program land for the nearby high school. The gift of open space and existing mature trees in a very dense part of the city became inspiration for the school as an urban oasis. It also influenced the educational vision towards a nature-based learning approach.
