

REGIS JESUIT HIGH SCHOOL SCIENCE AND CTE INNOVATION CENTER

PEOPLES CHOICE

Designed as a new main entrance to the co-divisional campus, this building brings students and faculty together through spaces dedicated to science, innovation, and media arts. Its unique "inverted corridor" design frames inspiring mountain views while transforming circulation zones into places for collaboration and spontaneous learning. At its heart, a clerestory-lit lobby with display areas and grand learning steps invites curiosity and connection. Sustainable systems and a solar array that offsets nearly 75% of energy use reflect the district's forward-thinking commitment to a brighter, more responsible future.
